## PERFECTAMINO® The True Science of Protein

BodyHealth's flagship product, PerfectAmino, is revolutionizing protein synthesis. PerfectAmino is utilized up to 99% to help build new protein, muscle & collagen without the caloric impact of other dietary proteins & without breaking a fast.\* It is further supplemented with Nucleic Acid building blocks to help direct the process of Protein Synthesis.\*

Tablets | 150 / 300 / 600 Count

Non-GMO • Gluten, Soy, Dairy & Sugar Free  
Paleo & Keto-Friendly • Vegan Sourced

### Available in:

- Coated
- Uncoated

**Build Lean Muscle without the excess calories\***

**Boost Performance\***

**Improve Recovery\***

**Up to 99% Utilized by the Body\***

**Does Not Break a Fast\***

## Supports Optimum Protein Synthesis\*

Composed of pure essential amino acids in the precise form and ratio necessary to build new protein and collagen for muscle, bone, healthy skin, hormones and much more, with almost no caloric impact.

Most people know protein is essential for optimum health, but assume they consume enough through food. But it's not about how much protein you're consuming, it's about how much your body is able to receive and use. Eggs, meats, fish, and nuts are less than 50% used to build actual protein, while whey and collagen are about 18% utilized. The unused portion is mainly converted to sugar, body fat, or waste.

This leads to more calories and less usable protein than we think we are getting, which contributes to: trouble losing weight, loss of muscle mass, brittle bones, hormonal imbalance, and slower recoveries from injury, illness, and exercise.

## Our New Enhanced Formula

While PerfectAmino contains the precise building blocks of protein, Nucleotides are the building blocks of DNA and RNA, the genetic codes that determine exactly how these amino acids are used in our body. By adding Nucleotides to PerfectAmino, we optimize PerfectAmino's use within the cell in the creation of new protein, helping to direct the process of protein synthesis and improve genetic health and performance.
